PiTiME – Clock Health Monitoring Software

GAMP5 Compliant

Clock Health Monitoring

Assured Data Integrity

Comprehensive Audit Trails

Scheduled Backups & Reports

Web Access

Advanced backup & Review
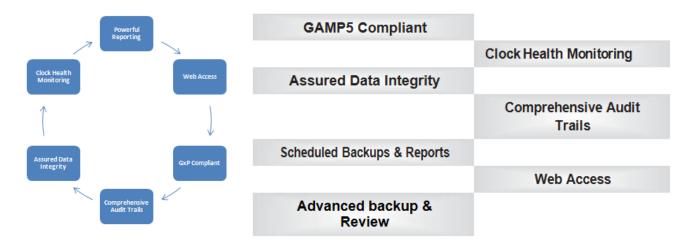

PiTiME is the latest offering from Polmon for monitoring health status of Clocks. PiTiME securely logs the data from clocks, stores in the inbuilt historian, and makes the data available over the web. Comprehensive Audit Trails allow GxP events to be captured and reviewed by exception.

Features

• Web based architecture. This eliminates the need for installing client software on PC. PiTiME can be accessed from any PC through a Chrome browser.

a. Audit trail review

b. Backups and restore

c. User account deactivate
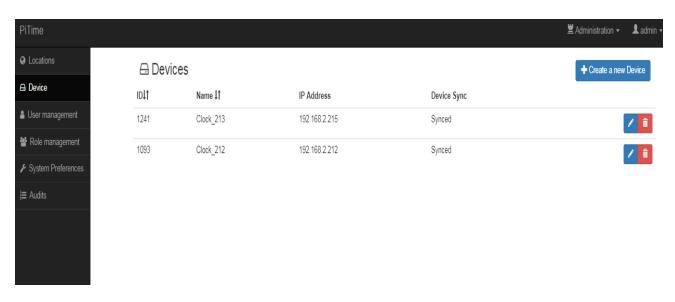

d. Access control User management

• Status indication for clock synchronization with NTP

• Online and offline data can be viewed.

• No limitation for the creation of users.
