

MOBILE - SOLVENT DISPENSING / DOSING SYSTEM

Suitable for any type of solvent dosing into reactor. Single system can dose different types of liquids in Batch Production. Highly accurate Flow meter to measure the liquid. Zone IIA / IIB approved controller with HMI with finger tip selection of batch size and setting. Fully constructed in SS316 for corrosive liquids and environments.

- Mobile Solvent system with precise flow measurement
- Economical, yet easy to operate system for solvents and liquid dispensing.
- Cam lock connectors for quick fit and eliminate solvent leakage in shop floor
- All parts MOC is SS316, can be customized
- No validation reports and compliance hassles
- Anti static wheels
